

## About Us

**Greenfield Oil & Trading Services Pvt. Ltd. (GOTS)** is a rapidly growing energy solutions provider, committed to revolutionizing oil & gas operations through innovation, technology, and industry expertise.

Headquartered in India, we specialize in:

**Upstream operational services**

**Energy Trading**

**Oil Field Logistics**

**Digital transformation of well operations**

## Our Vision:

To redefine the future of oil & gas operations through intelligent digital systems that bridge operational gaps and drive performance.

## Our Mission:

- Revolutionize oil & gas workflows through AI-powered digitalization
- Minimize import dependency and save CAPEX through in-house engineering innovation
- Deliver cost savings and generate measurable value for every client

## Our Core Services

**Software Development**

**AI/ML Data Analytics**

**Upstream Consultancy**

**Training Program**

## Current Challenges in Oil & Gas Industry

Most oil & gas teams face serious inefficiencies due to disconnected data and manual workflows. Key problems include:

**Manual Dependency & Paper-Based Tracking**

**Reactive vs Preventive Maintenance**

**Inefficient Equipment Utilization**

**Certification & Compliance Risks**

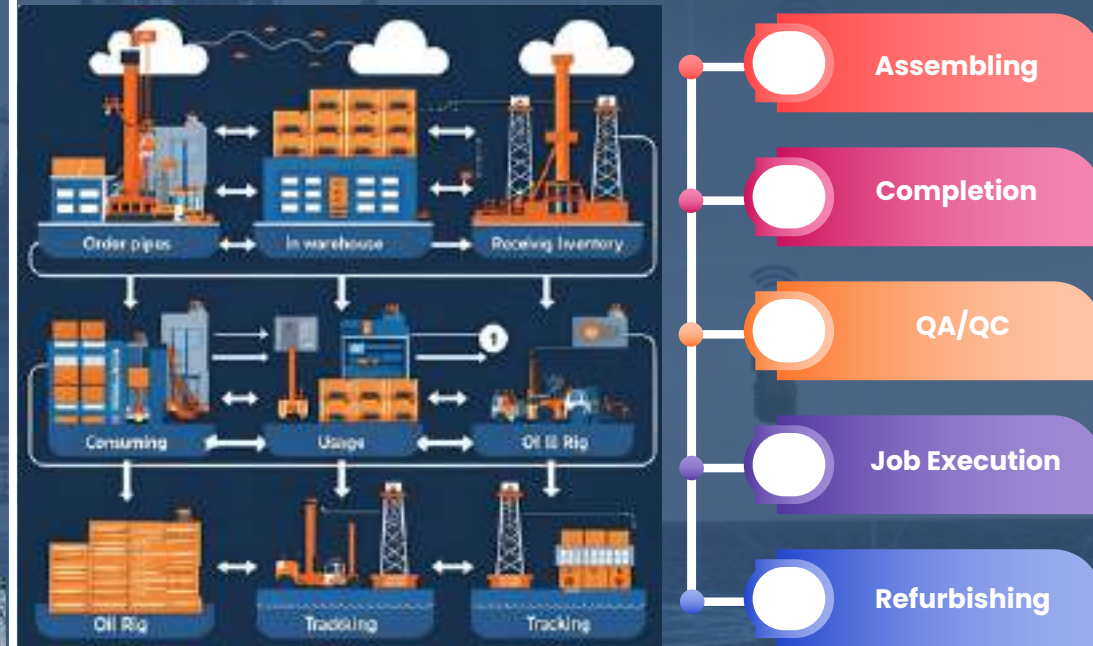

**Disconnected Departments & Data Silos**

**Is your team losing time and money just to collect, clean, and interpret data?**

## Introduction to AutoPro

**Autopro** - An application to digitize engineering process in any operation design involving planning, execution & analysis.

*"One Platform. Infinite Operational Control".*

Whether you're looking to digitize 5 assets or 5000 — AutoPro brings operational intelligence to your fingertips.

## Core Features

### 1. Inventory Management

"Say goodbye to manual spreadsheets, stock mismatches, and last-minute shortages."

**AutoPro's Inventory Management** module puts you in full control — with a powerful, centralized system that tracks every item, triggers alerts before you run low, and streamlines procurement with zero guesswork.

Whether you're managing consumables, high-value tools, or critical equipment, AutoPro gives you

Real-time **multi-location** visibility

Full traceability from **PO to consumption** at every step.

**"Track smarter. Procure faster. Store better."**

### 2. Vendor Management

**Vendor Management** module keeps your supplier ecosystem organized, transparent, and traceable — ensuring timely deliveries, pricing clarity, and vendor performance insights.

Track vendor orders, sales, details to the extent of automated purchases orders.

Track the performance of vendors on delivery vs payment and time.

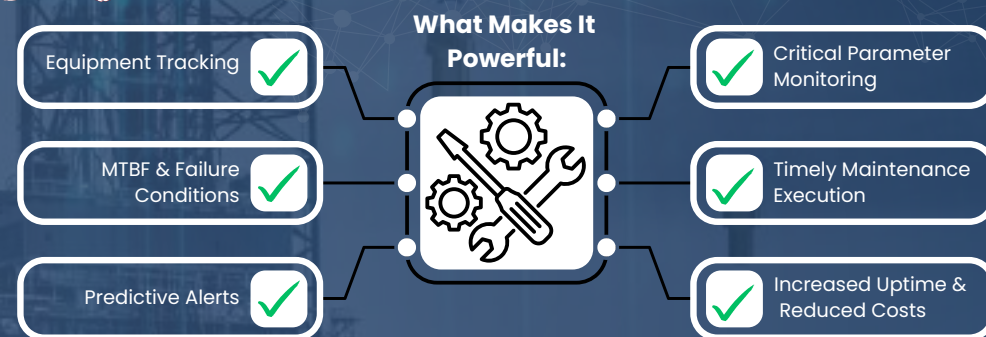

Ability to include huge amount of data base and data analytics.

### 3. Preventive Management

"Predict. Prevent. Perform — AutoPro keeps your equipment two steps ahead."

**Operational downtime** doesn't just delay work — it drains revenue. AutoPro's Preventive Maintenance module gives you the power to stay **ahead of failure** through **intelligent tracking, in-built calculations, and predictive alerts**.

**All maintenance activities are timestamped, archived, and easily reportable for audits and historical trend analysis.**

AI-backed predictive models help you anticipate breakdowns days in advance, saving enormous downtime & costs.

### 4. Rig Tracker

"From wellsite to workshop — track your rigs in real-time with zero blind spots."

AutoPro Rig Tracker centralizes all rig movement, status, location, and usage in one unified dashboard — **empowering you with live control and operational clarity.**

#### Key Functionalities:

Real-Time Rig Location & Status

Track rig mobilization and demobilization — who approved it, when it moved, where it's headed, and its ETA.

Multi-Rig Dashboard with Filters

Rig Tracker syncs with your Rental, Maintenance, and Certification modules

**ACTIVE**

**IDLE**

**IN TRANSIT**

**UNDER MAINTENANCE**

## 5. Rental management

*"Track, bill, and optimize your rental assets — AutoPro act as an all from one control tower."*

Field operations often rely on rented equipment — but without proper tracking, invoices get delayed, equipment goes unreturned, and vendors overbill.

AutoPro Rental Management brings transparency, control, and automation to the entire rental lifecycle — whether you're renting in or renting out.

### Core Features:

Track All Rental Equipment / Assets

Expected vs Actual Cost Comparison

Dynamic Dashboards for Executives

Quotation & Sales Order Management

Asset Life Optimization

**"Rent smart. Track better. Spend less — with AutoPro."**

## 6. Certification Tracking

*"Compliance made effortless. Certification made trackable."*

AutoPro's Certification Management ensures that every critical asset, equipment, or technician stays compliant with minimal manual effort.

Central Repository of All Certifications

Auto-Expiry Notifications & Escalations

Equipment-Wise & Personnel-Wise Linking

Renewal Workflow Automation

Compliance Status Dashboard

**"Stay certified. Stay compliant. Stay ahead — with AutoPro."**

## What Makes AutoPro Unique?

AutoPro isn't just another oilfield software — by blending field practicality with digital intelligence — specifically designed for operations-heavy sectors like Oil & Gas, Drilling, EPC, and Industrial Services.

 Built for Field Realities, Not Just Office Workflows

 Dynamic Dashboards with Real-Time Intelligence

 Preventive + Predictive Workflows

 Decision Intelligence, Not Just Data Entry

 First in Class – Rental + Certification + Maintenance Combo

 Customizable to Your Workflows

## Why G.O.T.S?

*"Our strengths go beyond software — they're rooted in expertise, innovation, and unmatched industry focus."*

Proven success in digital transformation

Agile team with custom development capabilities

Decades of upstream experience

Deep domain knowledge + technical precision

Trusted by national and international clients

## Conclusion: A Smarter Way to Operate

**AutoPro is more than software — it's an operational enabler.**
