# SMART CARBON MANAGEMENT FOR A SUSTAINABLE FUTURE

Simplify your path to sustainability with AI-driven carbon intelligence.
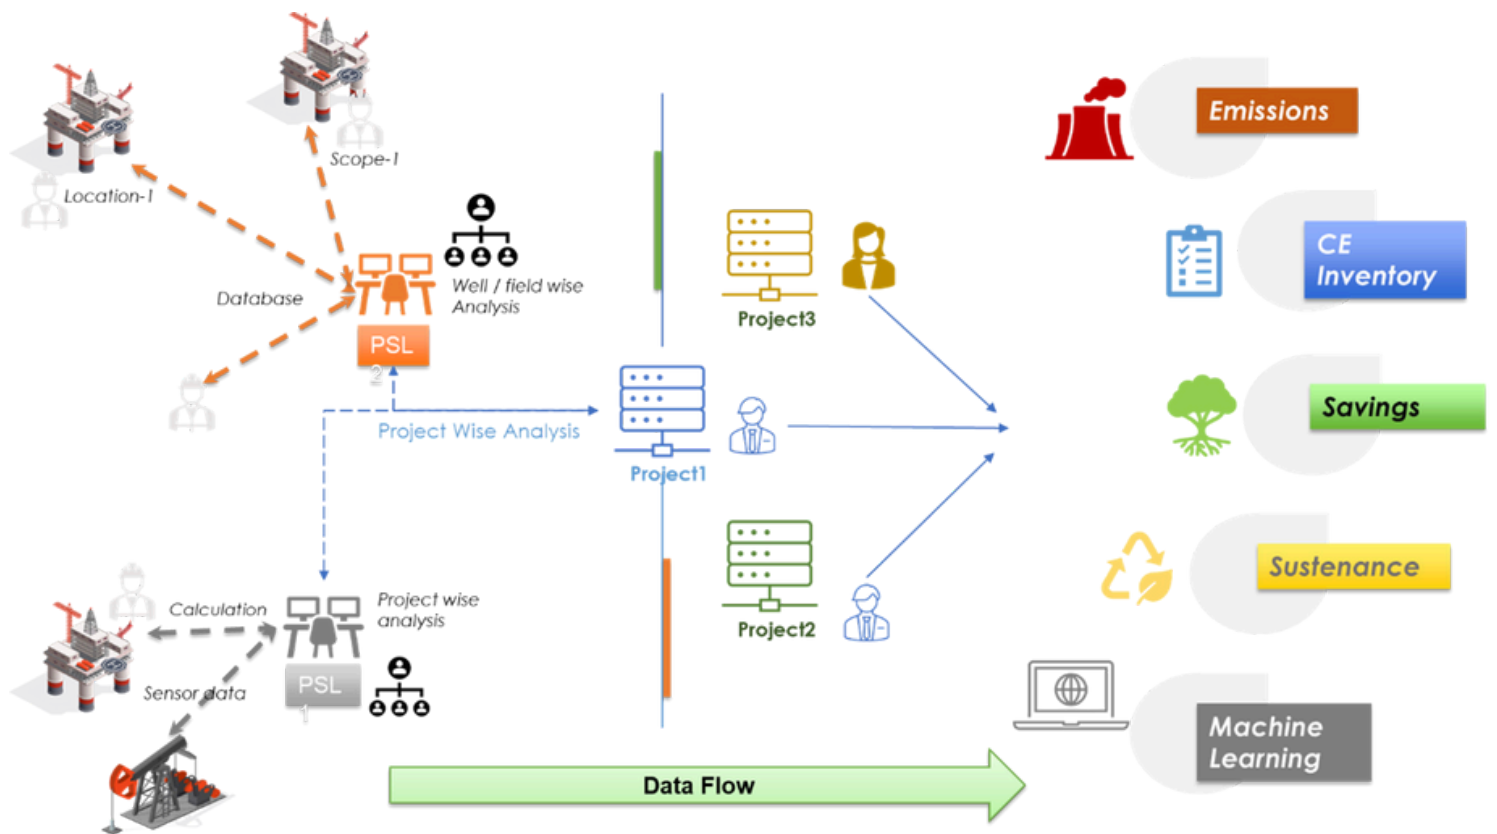

MEET GREEN™ — YOUR CARBON INTELLIGENCE PARTNER

GREEN™ is India's first AI-powered carbon management platform that helps organizations and individuals measure, reduce, and offset their emissions — all in one place.

Designed to make sustainability simple and actionable, **GREEN™** transforms complex emission data into clear insights and reduction strategies — empowering you to lead the change toward a low-carbon future.

WHO GREEN™ IS BUILT FOR

**GREEN™is built for everyone committed to sustainability:**

- **Corporates** – Engage employees and embed sustainability into everyday operations with the **GREEN™** App — perfect for HSE, CSR, and net-zero commitments.
- **Carbon-Intensive Sectors (Energy, Construction, Logistics, Manufacturing, etc.)** – Identify emission hotspots, optimize operations, and assess carbon offset and credit eligibility.
- **CCUS & Green Tech Providers** – Showcase your innovation's carbon reduction impact and give clients a measurable sustainability advantage.
- **Consultants (Biofuels, Gases, Energy, etc.)** – Use **GREEN™** to quantify avoided emissions and deliver data-driven sustainability insights your clients can trust.
- **Individuals** – Track your daily footprint, carbon savings, and reforestation impact — becoming a true sustainability hero.

Whether you're managing a facility or living consciously — **GREEN™** makes climate action measurable.

THE GREEN™ APP — SUSTAINABILITY MADE SIMPLE

Empower your teams and individuals alike — sustainability in your pocket.

PERSONAL DASHBOARD

🌱 Daily carbon savings
🚗 Travel & lifestyle emissions
🌳 Reforestation impact tracker

CORPORATE DASHBOARD

🏭 Plant, fleet & equipment data
⚡ Energy & business emissions
📊 Emission insights, reports, and reduction targets

OUR CORE SOLUTIONS FOR A LOW-CARBON FUTURE

Built for precision and impact, **GREEN™** delivers a comprehensive approach to the carbon lifecycle across four integrated modules:

1. **GHG Emission Accounting** – Capture and analyze Scope 1, 2, and 3 emissions with ISO-aligned, AI-enhanced precision.
2. **Product Carbon Footprint (PCF)** – Measure cradle-to-grave product emissions to meet eco-labelling and supply chain standards.
3. **Life Cycle Assessment (LCA)** – Go beyond carbon to assess 12 impact categories for holistic sustainability.
4. **Emission Reduction Planning** – Identify optimization opportunities, explore carbon credits, and plan your roadmap to net zero.

OUR ECOSYSTEM OF SUSTAINABILITY PARTNERS

GREEN™ partners with sustainability leaders, technology innovators, and industry experts to deliver trusted and future-ready climate solutions.
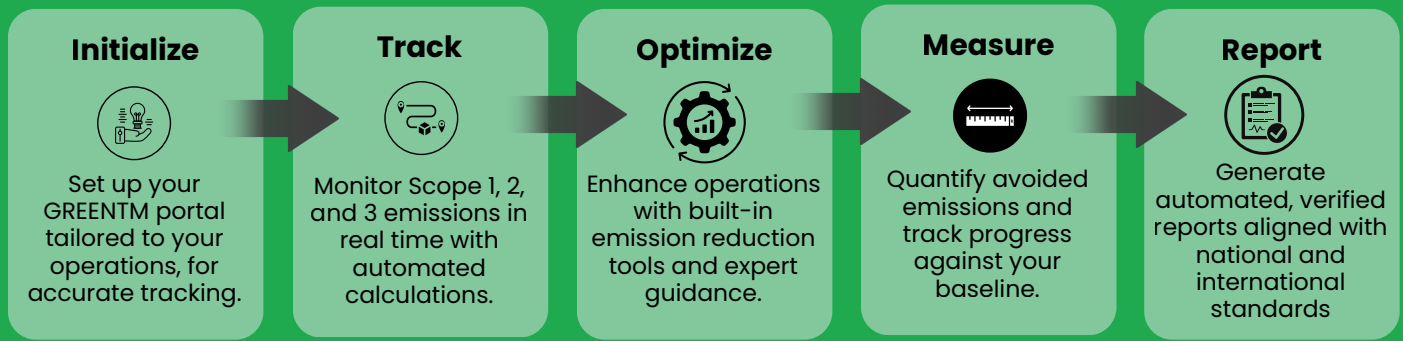

FROM DATA TO DECARBONIZATION

GREEN™ simplifies sustainability through a data-driven workflow — capturing, analyzing, and transforming emission data into clear actions and measurable results.
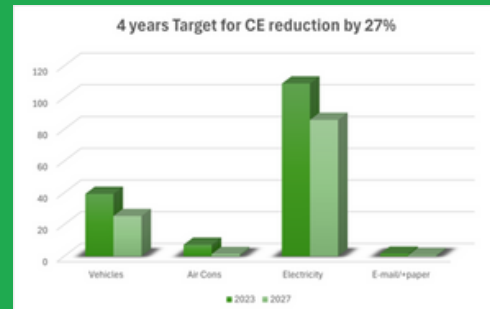

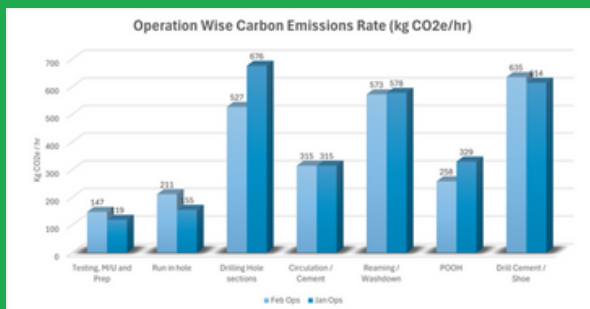

Initialize	Track	Optimize	Measure	Report
Set up your GREENTM portal tailored to your operations, for accurate tracking.	Monitor Scope 1, 2, and 3 emissions in real time with automated calculations.	Enhance operations with built-in emission reduction tools and expert guidance.	Quantify avoided emissions and track progress against your baseline.	Generate automated, verified reports aligned with national and international standards

"You can only reduce when you know the numbers"

DRIVING REAL-WORLD CLIMATE IMPACT

A leading energy firm used GREEN™ to track emissions across wellsites and offices, uncovering optimization opportunities in energy use, refrigerants, and fleet operations. The company is now on track to achieve a projected 27% reduction in emissions over four years, turning sustainability insights into tangible climate impact.
